Note:

- Other Short-term Liabilities has been computed as Total Short-term Liabilities less Commercial paper less Non-convertible debentures (Original maturity of less than one year)
- Total Liabilities has been computed as Total Assets less Equity share capital less Reserve & Surplus

(vi) Institutional set-up for Liquidity Risk Management

The Board of Directors of the Company has an overall responsibility and oversight for the management of all the risks, including liquidity risk, to which the Company is exposed to in the course of conducting its business. The Board of Directors also approves constitution of Asset Liability Committee (ALCO) which is the decision making unit responsible for balance sheet planning from risk-return perspective including the strategic management of interest rate and liquidity risks. In addition to monitoring the risk levels of the Company, the ALCO reviews the results of and progress in implementation of the decisions made in the previous meetings. The meetings of ALCO are held Quarterly or more frequently, if needed. The ALCO discusses the ability of the Company to meet its liabilities as they become due and ensures that the probability of an adverse situation developing is reduced. An important objective of the Liquidity Risk Management framework is to ensure that periods of liquidity stress which may arise

because of market conditions are endured. The ALCO measures the liquidity positions of the Company on an ongoing basis and also examines how liquidity requirements are likely to evolve under different assumptions. ALCO provides guidance and directions in terms of interest rate, liquidity, funding sources, and investment of surplus funds.

Note: All the numbers are based on Audited financial results for the Financial year 2020-21.
